## ABOUT ME

Motivated and detail-oriented IT undergraduate specializing in software engineering, with hands-on experience in full-stack development across web and mobile platforms. Skilled in Python, Java, and front-end technologies, with a strong foundation in project management, teamwork, and problem solving. Eager to contribute to impactful projects, apply technical skills in real-world scenarios, and gain valuable industry experience while driving efficiency and accessibility through technology

## EDUCATION & TRAINING

### Bachelor of Information Technology (Hons.) in Software Engineering

**ESU ESOFI Uni** [ 10/10/2022 - Current ]

**City:** Colombo 04 | **Country:** Sri Lanka

Built strong foundations in software engineering, database design, web and mobile application development

Engaged in individual and group projects, applying theoretical knowledge to real world IT solutions

Strengthened problem-solving, teamwork, and innovative thinking through hands-on coursework

### Diploma in Information Technology

**ESOFI Metro Campus** [ 04/01/2021 - 08/06/2022 ]

**City:** Kurunegala | **Country:** Sri Lanka

- Graduated with a Merit overall grade in a comprehensive, 1,200-hour Assured Diploma in Information Technology certified by Pearson.
- Developed strong, balanced foundations across critical IT domains including Software Engineering, Programming (Python & C#), and Databases with SQL.
- Successfully executed an extensive final project demonstrating end-to-end capabilities in system design, technical documentation, and practical system implementation.

### Ordinary and Advanced Level Education

**D.B. Welagedara Central College** [ 05/01/2009 - 02/08/2019 ]

**City:** Kurunegala | **Country:** Sri Lanka

## SKILLS

### Languages and Frameworks

HTML, CSS, PHP programming | Java knowledge | C# | Javascript (React.js) | Python, Django, Flask, Numpy, Pandas

### Mobile Applications

Android App Programming (Kotlin and Flutter) | App development: Flutter & Dart, React & React native,

### Database Development

MySQL | SQL | MongoDB | NoSQL

### UI/UX Design

Figma

## PROJECTS

---

[ 04/08/2025 - 04/09/2025 ]

**Smart Accessible Cooking Assistant** Developed a mobilefirst recipe app designed for visually impaired users, applying HumanComputer Interaction (HCI) principles to improve accessibility in everyday cooking. The app integrates voice guidance, gesture navigation, and haptic feedback to create a safer, more intuitive cooking experience, while also introducing ingredientbased recipe suggestions to reduce food waste.cription

[ 05/08/2024 - 01/08/2025 ]

**The Voting System** Developed a secure digital voting platform that integrates facial recognition for voter authentication and blockchain technology for tamperproof vote recording. The system is designed to improve transparency, accessibility, and trust in elections, with features such as realtime results, admin dashboards, and responsive mobile interfaces

[ 01/05/2024 - 03/06/2024 ]

**Care Expert : Health Care Consultation App** Designed a mobilefirst healthcare application prototype focused on patient convenience and transparency. The app streamlines medical consultations by integrating login/signup flows, appointment scheduling, service search, and secure payment processing

[ 01/01/2024 - 01/05/2024 ]

**NutriCare - Personalized Meal Plan for Patient-Centric Wellness** Design and develop a web-based meal management system tailored for individuals with diabetes, high blood pressure, food allergies, and other medical conditions. The platform integrates personalized diet plans, calorie and BMI calculators, grocery list generation, and direct consultation with dietitians, offering a holistic approach to dietary management.

[ 01/01/2024 - 01/02/2024 ]

**Shop with Us : E-Commerce Website** Designed and implemented a multipage web application and included developing a Home Page, About Us, Contact Us, Product Page, and Login/Signup system, showcasing skills in frontend design, user experience, and secure authentication.

[ 01/12/2023 - 03/01/2024 ]

**Job Recruitment Management System** Developed a centralized recruitment platform that streamlines job posting, applications, and candidate tracking. Designed with Agile methodology, the system improves efficiency, transparency, and fairness for both employers and job seekers, with features like resume databases, advanced search filters, and realtime notifications.

[ 01/06/2023 - 03/07/2023 ]

**Online Homeschooling System : SQL Based** The project used SQL queries and schema design to model core entities such as students, parents, administrators, and support staff, enabling efficient data storage, retrieval, and progress tracking.
